

ElectraPrint™

Junior Series

AP-67J

ElectraPrint Junior™

It's electric. The freedom of electricity makes these machines quieter to run, easier to maintain and less expensive to operate. Standard features such as iMade, Shirt Skippy, Flash ports on all heads and direct-drive x-y-z micro registration make this small footprint machine a power house of production.

ElectraPrint machines produce a much more consistent printing result compared to common air driven systems. No risk of expensive air line and valve contamination. No expensive air compressor, air chiller, regulators or air lines. No need to house and maintain all that unnecessary equipment. Just plug it in and off you go.

ElectraPrint™

Junior Series

Electrical features

- Easy to understand control panel.
- Auto start and shut down.
- Independent squeegee speed control.
- Independent head multi-stroke up to 9x.
- Manual print mode on each head.
- Onboard self diagnostic system.
- Flash ports on each head.
- Shirt skip detector.
- Foot pedal semi-auto mode.
- iPod mounting system with speaker.
- Shirt counter.
- Audible sound alert.
- Requires only 120V, 20A electrical power. NO AIR.

i-Made features

- Print in any head order.
- Flash as often as needed.
- Program up to 3 rotations.
- Provides flexibility to the art and the print run.

Warranty

- 1 year for all parts.
- 7 years for registration gate.

Mechanical features

- Direct drive micro registration system.
- Independent flood bar and squeegee.
- Squeegee and floodbar for each head included.
- Independent flood bar and squeegee pressure.
- Winged flood bars
- Quick release flood bar and squeegee – no tools.
- Quick release rubber topped aluminum platens.
- Full machine off-contact adjustment.
- Independent head off contact adjustment.
- Front screen loading.
- Side clamp screen holders.
- Print stroke adjustment from 10" to 15".

Construction features

- Hardened steel registration system.
- Never-wear bearing system.
- AC drive and lift.
- Fully electric print heads.
- Industrial stacklight for safety.
- Heavy-duty safety bars.
- Some models are expandable to add colors.
- Heavy-duty steel construction.
- Minimal maintenance requirements.
