

LED exposure system

LED Exposure System

New technology. Energy efficiency, space efficiency and digital controls bring this unit to today's new age of green thinking. Built with the Brown standard of durable construction, this unit is designed to move your shop into the new age.

Designed using light-modeling software technology to increase efficiency and consistency. This LED grid pattern design has calculated light angles to eliminate undercutting and the reflector system includes absorbent materials to reduce light reflection. The Brown LED system lights are designed to target the light spectrum specified by world class emulsion manufacturers.

These LED driven units feature a digital timer with 10 available presets. The vacuum hold down is activated by the digital timer. The system features an amber safety light function, tempered glass and heavy duty construction to make this an industrial powerhouse.

LED exposure system

LED Blue Light

LED Amber Safe Light

LED System benefits

- Reflector system with absorbent materials
- LED grid pattern design for zero undercutting
- Perfect light spectrum targeting
- Polymer emulsion exposure times under 20 seconds
- Dual-cure exposure times under 2 minutes
- Minimal heat at the glass.

Construction

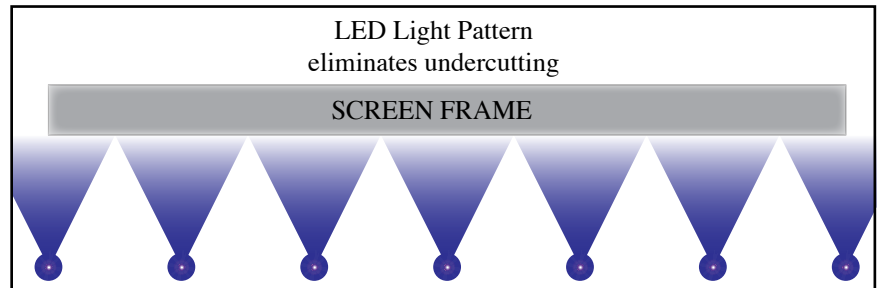

- Tempered glass.
- Quick pull vacuum system.
- Quiet vacuum system.
- Heavy-duty vacuum blanket.
- Standard 120 volt, 15 amp power requirement.
- Screen drying cabinet base option for 2931 models.
- International Electric Upgrade available.

LED System features

- Digital timer with an automatic reset feature.
- 10 programmable timer presets.
- Bulb life of 20,000 hours.
- LED light source.
- Amber safe light mode.
- Vacuum hold down.
- Vacuum delay timer.
- Automatic vacuum shut off.

Warranty

- 4 year for all parts.
